Education

Pranveer Singh Institute of Technology, Kanpur, Uttar Pradesh **Sep 2024 – Apr 2028**

B.Tech. in Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Cumulative GPA: *7.92 / 10.0*

Vishwanath Academy, Lucknow, Uttar Pradesh **Apr 2023 – Mar 2024**

Senior Secondary (Class XII), CBSE – Science Stream

Percentage: *88.2%*

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: Next.js, React, React Native, Node.js, Express.js, Tailwind CSS, Socket.IO, Prisma ORM

Developer Tools & Cloud: Git, GitHub, Docker, AWS (EC2, S3), Supabase (PostgreSQL), MongoDB, Redis

AI & Machine Learning: LangGraph, Scikit-learn, NumPy, Pandas, Matplotlib

Core Concepts: Data Structures & Algorithms, Low Level Design, Database Management Systems, Operating Systems

Projects

QuantFlow | ***C++, Next.js, LangGraph, Mistral AI, AWS EC2*** | | **Jul 2026 – Sep 2026**

- Engineered a quantitative backtesting engine in **C++20** processing **1.48M+ ticks/sec** on AWS EC2 via contiguous memory buffers and zero runtime heap allocations during execution loops; verified by **197 GoogleTest cases**.
- Architected a **LangGraph multi-agent system** with Mistral AI using cyclic state reflection to parse natural language strategies, validate parameter bounds, and iteratively tune Sharpe ratio and maximum drawdown before memo synthesis.
- Eliminated look-ahead bias via timestamp-ordered execution and conservative intrabar stop-loss rules across **7 strategy models**; virtualized tick datasets via Supabase S3 and secured checkout with **HMAC SHA-256 Razorpay webhooks**.

Joblio | ***React Native, LangGraph, Groq, MongoDB, Redis*** | | **Oct 2026 – Present**

- **Published on Google Play Store**; built a full-stack AI career platform in React Native with a FastAPI microservice running **LangGraph multi-agent pipelines** for resume matching, GitHub hygiene auditing, and automated CI/CD fix generation.
- Designed a two-pass NLP skill extractor recognizing **570+ technologies** from live job listings; reduced prompt token consumption by **60%** via resume pruning and deterministic dictionary lookups before LLM inference.
- Built **26-week ML demand forecasting** with **80% confidence intervals** across tech skills; cached paper explanations in Redis for **30 days**, cutting repeat inference costs to zero.

HackCentral | ***React, Node.js, Express, MongoDB, Socket.IO, AWS EC2*** | | **Mar 2026 – Jun 2026**

- Architected an event discovery platform delivering **sub-200ms API response times** and a **95+ Google Lighthouse score**; optimized database performance using compound indexing on {`userId, eventId`} and lean aggregation queries.
- Implemented real-time bidirectional messaging via **Socket.IO** and integrated Gemini API with **Zod-enforced** structured JSON output to automate hackathon submission evaluation and pitch deck generation.
- Engineered secure Role-Based Access Control (RBAC) with **httpOnly cookies, JWT, and Google OAuth**; containerized microservices with multi-stage Docker builds and deployed automated CI/CD pipelines to AWS EC2.

Achievements & Competitive Programming

- **Deviathon National Hackathon Winner:** Secured 1st place in the problem statement category at Deviathon (GLA University) for developing an AI-powered meeting analysis platform.
- **LeetCode:** Solved **450+** Data Structures & Algorithms problems with a contest rating of **1562**.
- **CodeChef:** Achieved **3-Star** rating with a peak rating of **1602** and a best global rank of **392**.

Certifications

- **Generative AI and LLMs: Architecture and Data Preparation – IBM (Coursera)** – Specialized in Transformer architectures, LLM tokenization, and NLP pipelines with a 100% grade.
- **AWS Certified Solutions Architect - Associate – AWS (Coursera)** – Completed training in AWS architecture, VPC design, IAM security, and resilient systems with a 94.73% grade.
