Education

Pranveer Singh Institute of Technology, Kanpur, Uttar Pradesh **Sep 2024 – Apr 2028**

B.Tech. in Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Cumulative GPA: *8.1 / 10.0*

Vishwanath Academy, Lucknow, Uttar Pradesh **Apr 2023 – Mar 2024**

Senior Secondary (Class XII), CBSE – Science Stream

Percentage: *88.2%*

Technical Skills

Languages: C++20, C, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: Next.js 16, React 19, Node.js, Express.js, Tailwind CSS, LangGraph, Socket.IO, Prisma ORM, Recharts

Developer Tools & Cloud: Git, GitHub, Docker, AWS (EC2, S3), Supabase (PostgreSQL), MongoDB Atlas, Redis, CMake, Vercel

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, System Design, REST APIs, WebSockets, CI/CD

Projects

QuantFlow | ***C++20, Next.js, LangGraph, Mistral AI, AWS EC2*** | | **Jul 2026 – Sep 2026**

- Engineered a quantitative backtesting engine in **C++20** processing **1.48M+ ticks/sec** on AWS EC2 via contiguous memory buffers and zero runtime heap allocations during execution loops; verified by **197 GoogleTest cases**.
- Architected a **LangGraph multi-agent system** with Mistral AI using cyclic state reflection to parse natural language strategies, validate parameter bounds, and iteratively tune Sharpe and drawdown before memo synthesis.
- Eliminated look-ahead bias via timestamp order execution and conservative intrabar stop-loss rules across **7 strategy models**; virtualized tick datasets via Supabase S3 and secured checkout with **HMAC SHA-256 Razorpay webhooks**.

HackCentral | ***React, Node.js, Express, MongoDB, Socket.IO, AWS EC2*** | | **Mar 2026 – Jun 2026**

- Architected an event discovery platform delivering **sub-200ms API response times** and a **95+ Google Lighthouse score**; optimized database performance using compound indexing on {`userId, eventId`} and lean aggregation queries.
- Implemented real-time bidirectional messaging via **Socket.IO** and integrated Gemini API with structured JSON output parsing to automate hackathon submission evaluation and code quality analysis.
- Engineered secure RBAC session management with **httpOnly cookies, JWT, and Google OAuth**, containerizing micro-services with multi-stage Docker builds and deploying automated CI/CD pipelines to an AWS EC2 instance.

Career Connect | ***React 19, Stream.io, Clerk, Monaco Editor, Piston API*** | | **Dec 2025**

- Built a real-time collaborative coding platform with **WebRTC video conferencing** and live chat via Stream.io with **sub-100ms latency**, featuring automated reconnection and state recovery logic.
- Integrated an interactive **Monaco code editor with Piston API execution**, enforcing 5s execution timeouts to sandbox compilation across **10+ programming languages** with regex error line mapping.
- Engineered event-driven interview tracking workflows using Clerk authentication and Inngest background jobs, automating post-interview score recording and reducing manual coordination overhead by **60%**.

Achievements & Competitive Programming

- **Deviathon National Hackathon Winner:** Secured 1st place in the problem statement category at Deviathon (GLA University) for developing an AI-powered meeting analysis platform.
- **LeetCode:** Solved **400+** Data Structures & Algorithms problems with a contest rating of **1562**.
- **CodeChef:** Achieved **3-Star** rating with a peak rating of **1602** and a best global rank of **392**.

Certifications

- **Generative AI and LLMs: Architecture and Data Preparation – IBM (Coursera)** – Specialized in Transformer architectures, LLM tokenization, and NLP pipelines with a 100% grade.
- **AWS Certified Solutions Architect - Associate – AWS (Coursera)** – Completed training in AWS architecture, VPC design, IAM security, and resilient systems with a 94.73% grade.
